PROFILE

1.5 years ago I have decided to change my job and profession to the position of Frontend Developer. I am doing a lot of courses with exercises on Udemy and YouTube platform . I am still working on my portfolio. I stay up to date with current trends in website design and use my creativity to create a user-friendly website. Working in my current position as a civil servant forced me to change my career because it doesn't bring me satisfaction and doesn't give me the opportunity to develop. I want developing my skills as a junior frontend developer. I am an ambitious person. I learn very quickly. I am open to gaining knowledge and achieving goals. I am a task oriented, goal oriented and able to work under time pressure.
